

ULTRA SECURITY FEATURES

SECURITYMICROPRINT

Micro Print

Lines appear as broken to the human eye. The microprint border will often blur when scanned or copied.

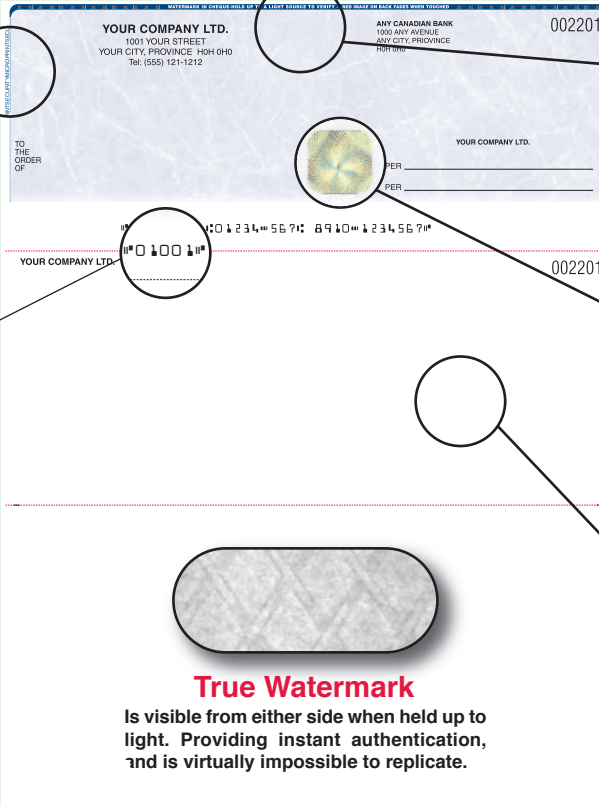

Toner Adhesion

Easily recognizable evidence of attempts at alteration of payee name or dollar amount by scraping or tape pulls.

Chain of Security

Manufactured and stored in secure facilities, distributed only to authorized security and cheque manufacturers.

WATERMARK IN CHEQUE

Warning Banner

Highlights watermark and heat sensitive image. Acts as a deterrent and provides verification that the cheque is an original.

Hologram Foil

Multicoloured reflective Hologram fused to each cheque, can not be reproduced using colour copiers.

Invisible Fibers

Imbedded in the paper. When exposed to fluorescent UV light they become visible. Can serve as a useful authentication tool.

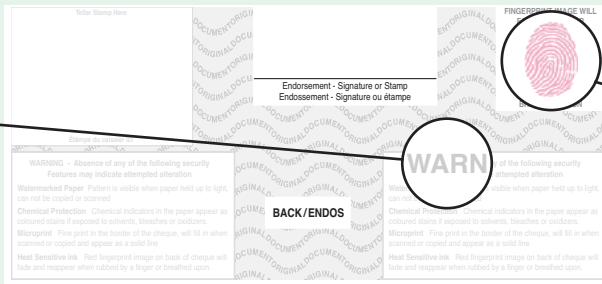

True Watermark

Is visible from either side when held up to light. Providing instant authentication, and is virtually impossible to replicate.

WARNING - Absence of any of the following security features

Security Warning

List of features acts as a potential deterrent. Mismatched pattern easily detects attempts made to cut and paste critical information.

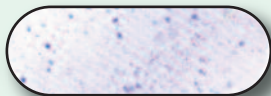

Thermochromic Ink

Instant authentication, image will fade briefly, when touched or breathed upon. Can not be duplicated by digital copiers.

CHEMICAL REACTIONS - Triggered by use of solvents, oxidizers, bleach, acid or alkali

Polar Reaction
(blue stain)

Non-Polar Reaction
(purple/blue stain)

Oxidant Reaction
(light yellow stain)

Acid Reaction
(pink stain)

Base Reaction
(turquoise stain)
